

# Ramona Expressway

## Roadway Rehabilitation Project

## Construction Completed

*Thanks for your patience during this roadway and safety improvement project.*

This project rehabilitated 9.25 miles of roadway on Ramona Expressway using a mixture of asphalt overlay, pavement reclamation, reconstruction and slurry seal. Additionally, the City of San Jacinto rehabilitated approximately 1 mile of the outer westbound lane of Ramona Expressway, between Warren Road and Sanderson Avenue, in San Jacinto.

**Minor activities may be completed during the day on Ramona Expressway, including guardrail replacement work.**

### Project highlights

- Removed and replaced the existing drainage facilities beneath the roadway.
- Reconstructed the signalized intersections at Lakeview Avenue, Hansen Avenue Warren Road.
- Replaced traffic loop detectors.
- Upgraded signals to video detection at Hansen Avenue and Warren Road.

### Safety improvements on Ramona Expressway include:

- A new safety edge and shoulder backing.
- New centerline channelizers (lane delineators).
- Newly painted median with rumble strips.
- Adding an edgeline rumble strip.
- Reconstructing guardrail with added reflective markers.
- Roadway restriping with pavement markers and reflectors.

New roadway surface with newly painted center median, rumble strips and lane delineators on Ramona Expressway.
